

IGAL RAICHELGAUZ

Founder & CEO

Igal is the Co-Founder and chairman of Cortica, the leader of AI technology for autonomous platforms since its foundation in 2007. Igal moved to lead Autobrain after it spun-off from Cortica in 2019. Before founding Cortica, Igal was the CTO of a speech recognition company, LCB, and prior to that, held several technical positions at Intel. Igal started his career in an elite intelligence unit in the IDF, and later went to be the CEO and co-founder of Figment, the first advanced messaging platform based on SMS. Igal started his Ph.D. research at the Technion in the field of cortical neural networks, but his Ph.D. was never completed; instead, Cortica was founded. Igal has received multiple technical and innovation awards and holds over 50 patents. In leading Autobrain since its establishment, Igal has become a leading voice in the automotive industry in leading the paradigm shift to self-learning AI, the huge technological leap needed to bring autonomous driving into the tangible present.
